

# REDUCE WHAT OTHERS CAN ACCESS

Small changes can help keep  
your online information private.

- Use strong, different passwords for work and personal accounts
- Check where your accounts are signed in
- Remove old or shared devices you no longer use
- Review access to work tools like email, calendars, and shared files
- Make sure only you can sign in on your phone or computer

## HELP NOW

If you are not safe: Call 911 or a crisis line.
